NotebookLM

PREMIUM EXECUTIVE READ-AHEAD

# GEOGRAPHIC CUSTOMER CONCENTRATION

**Highly Concentrated Base:** Over 75% of our customers are located in just four states, led aggressively by SP.

NotebookLM

PREMIUM EXECUTIVE READ-AHEAD

# CUSTOMER RETENTION DROP-OFF

**Overall Retention: 3%**
All customers

**São Paulo Retention: 3%**
(Only 1,296 returning out of 40,302 SP customers).

⚠ **The 3% Problem:** Top-of-funnel acquisition is essentially a leaky bucket. **Even in our densest and best-performing state (SP), 97% of buyers never return.**

NotebookLM

# CUSTOMER GROWTH RATE (YoY)

# REVENUE VS. SUPPLY MISMATCH ANALYSIS

Comparison of Total Revenue by Category against Seller Supply

**Revenue/Supply Mismatch Identified:**

Despite high revenue contribution, 'Gifts' category is severely under-supplied with vendors. We must aggressively onboard more seliers in this specific niohe to capture the market potential.

NotebookLM

# UNIT SALES VS. REVENUE SCATTER MATRIX

**STRATEGIC INSIGHT:** While Furniture and Electronics carry the volume, "Gifts" punches massively above its weight—driving disproportionate revenue despite significantly lower unit sales.

NotebookLM

# MONTHLY REVENUE TREND: 2017 VS 2018

**~80%**

**Total YoY Revenue Growth Projected (6.16M → 11.08M R$)**

**Urgent:** Despite massive YoY macro growth, month-over-month revenue has flatlined in mid-2018. We must deploy an aggressive Q4 holiday marketing and manpower plan immediately.

NotebookLM

## CRITICAL FRICTIONS

- Catastrophic 3% returning customer rate.
- Severe seller shortage in high-demand niches (Baby, Toys, Fashion, Gifts).
- Mid-2018 MoM revenue stagnation.

## GROWTH LEVERS

- Hyper-accelerating top-of-funnel customer acquisition (~63% YoY).
- Massive total revenue growth trajectory (~80% YoY).
- Hidden margin drivers (High revenue from low-unit categories like Gifts and Health & Beauty).

NotebookLM

## 1. Hyper-Local Focus

Halt immediate nationwide expansion. Concentrate marketing and logistics exclusively on the top 3 high-population states (SP, RJ, MG) to build density.

## 2. Data Enrichment

Overhaul the customer database. Transition from capturing only shipping addresses to capturing behavioral data to aggressively solve the 3% retention crisis.

## 3. Catalog Optimization

Institutionalize the 22-category taxonomy and launch a targeted vendor acquisition campaign for high-value/low-supply categories (Gifts, Baby, Toys).

**The Playbook: Master the core regions and categories today → Achieve exponential nationwide scale tomorrow.**
